Here in ciclahoma drilling operations are especially active in the
Coage and west of Beggs and Okmuigee. The only danger showing
reported of late is the big well in
30-15-11, where the Wilcox people
have drilled deeper and increased
the production from 200 to 600 barrels. Wells like this, with plenty of
sand, are really dangerous.

But the Osage is in a class by
itself, as things go these days, and
all the drilling and all the development that is going on over there
points only to one thing and this is
that there will be a lot more pipe
lines and the oil will be distributed
among a lot more refineries and thus
cannot hurt or barm the situation,
but will in reality be a benefit all
around.

around.

This helps Tulsa and will provide ample opportunity for the employment of labor and will be the means of another season of rapid growth, which will doubtiess equal anything ever seen here. In other words, Tulsa, is in for what would be dailed a "boom" in Texas, and that is all there is to it.

A Very Important Sale. Now comes the news that C. B.
